Height :	60 P	Max image scale @ 266dpi :	46.55 P
Width :	45 P	Max combo scale @ 500dpi :	P
Resolution :	300 dpi	Max mono scale @ 900dpi :	15 P

Error: TIFF not LZW Compressed**Challenge**

This TIFF file is not saved with LZW (Lempel Ziv Welch) compression. Using this compression will not harm the image, rather it will reduce the filesize and make the image more portable. Further information on LZW TIFF files can be found below.

Solution

Resave the file and enable LZW compression when saving the file as a TIFF. To do this, it is best to use Adobe(r) Photoshop(r).

Error: Not CCITT or LZW Compressed TIFF

This TIFF file is not saved with LZW or CCITT compression. Using this compression will not harm the image, rather it will reduce the filesize and make the image more portable.

Resave the file and enable LZW or CCITT compression when saving the file as a TIFF. To do this, it is best to use Adobe(r) Photoshop(r).
