

**SEATTLE AQUARIUM RESEARCH PROJECT PROPOSAL FORM**

All research performed at or in conjunction with the Seattle Aquarium facilities, collections, and/or staff must be preceded by submission of a project proposal which includes a project rationale, a working hypothesis, materials and methods, and a timeline. The project proposal must be approved by the Seattle Aquarium Curatorial staff. The Seattle Aquarium is given the right to review project results before publication in any form and if deemed acceptable for publication will be acknowledged and given copies of results. The following is to be completed and submitted to the Curator of Conservation Research/Animal Health.

Project title: The Effects of Local Environmental Contaminants on the Pacific Oyster: Preliminary Trial

Name of principal investigator (PI): Steven Roberts

Name(s) of Co-PI or other collaborators: Emma Timmins-Schiffman

Name(s) of home institution(s): University of Washington

IACUC approval number or permit number if applicable: N/A

Email address(s): emmats@u.washington.edu; sr320@u.washington.edu

Phone number(s): (302) 379-2501

Contact information for home institution or IACUC: (206) 543-4270

Funding agency of proposed research: N/A, materials donated

Project timeline: 1 month from start date

Subject and location of project in aquarium: Environmental effects on aquatic organisms; under dock

Aquarium staff involved: \_\_\_\_\_

Special requirements: Requesting approval only for pre-testing PSDs on Aquarium property. Will require access to aquarium dock twice: once to place the PSDs and again one month later to remove them.
